

Aronjit (Aron) Lageri, BSC, PG Certificate Long Term Care Administration  
778-2512138

Biography:

My Name is Aron Lageri, I have over 25 years of Health Science professional experience from teaching, mentoring and as professional in various roles within the direct umbrella of health care. I bring to the Board strong caring perspective for seniors, governance experience and community service. An engaged member of Canadian Real Estate industry, and presently serving on the Governance Committee of the Fraser Valley real Estate Board.

Through various roles in the health care industry, I have typically focussed on healthy communities, recruitment of health care profession trainees, constructive society and health care improvements. I understand the strength in being a community role model, encouraging and promoting healthy lifestyles and highly supportive of community driven climate initiatives.

My experience as a Health Science BC professional provided me with a well-versed acumen in safety and security protocols, digital technologies, cybersecurity issues, MRSO Training and Graduate level training courses. These various profiles in my career, besides providing me with a professional experience, aided me with learned collaboration techniques, integrity and leadership mentoring attributes over the years.

I came to Canada, as skilled immigrant professional in radiation technology, and have proudly served in over dozens of hospitals and health centers in British Columbia and elsewhere in Canada. Being an Immigrant myself, I understand the importance of social justice, equitable economy and need of progressive thoughts on climate correction.

I live in Surrey with my wife Nirmala, three children, pursuing post secondary and secondary schooling in universities and Surrey senior school respectively. In my spare time, we enjoy travelling to the forests, parks and recreational facilities in and around our community in beautiful British Columbia.
